Education _Generative AI + Pedagogy Meet-up

The COE, Vice Provost for Innovation in Education and the Provost are hosting a meet-up on generative AI and pedagogy. The COE recently made a significant investment in cutting-edge technologies and education, hiring three new faculty members (Drs. Juan Zheng, Zilong Pan and Shan Li, *joint with COH*) who are engaged in research in this area, particularly around the interface of new-wave technology and learning. We are planning an open campus conversation, entitled "Generative AI + Pedagogy Meet-up" featuring these faculty and the Provost Nathan Urban around the following questions:

1. How can we best use generative AI to enhance teaching and learning?
2. How might generative AI force changes in assessments? How can we best leverage those changes?
3. What research opportunities might generative AI create for education? Other fields?
4. What are some ethical considerations related to generative AI? How can we mitigate those?
5. If Lehigh were to 'plant a flag' on generative AI, what might we do? Which are the most promising lines of inquiry, practice, research to be first, best, only in this emerging field?

The meet-up will occur in **Rauch 251 on February 27th from 2:00PM to 3:30PM**. Dean Bill Gaudelli (COE) will moderate the conversation. Hope you will join us!

Please RSVP by filling out [this form](#).
